

KRAZY KITTY'S EASTER Free Design Download

My little crazy kitties live in a little world of their own. They spend a great deal of time getting up to all sorts of mischief.

This little grey crazy kitty fancies himself as an Easter bunny and thought it would be fun to pop out of a brightly coloured Easter egg.

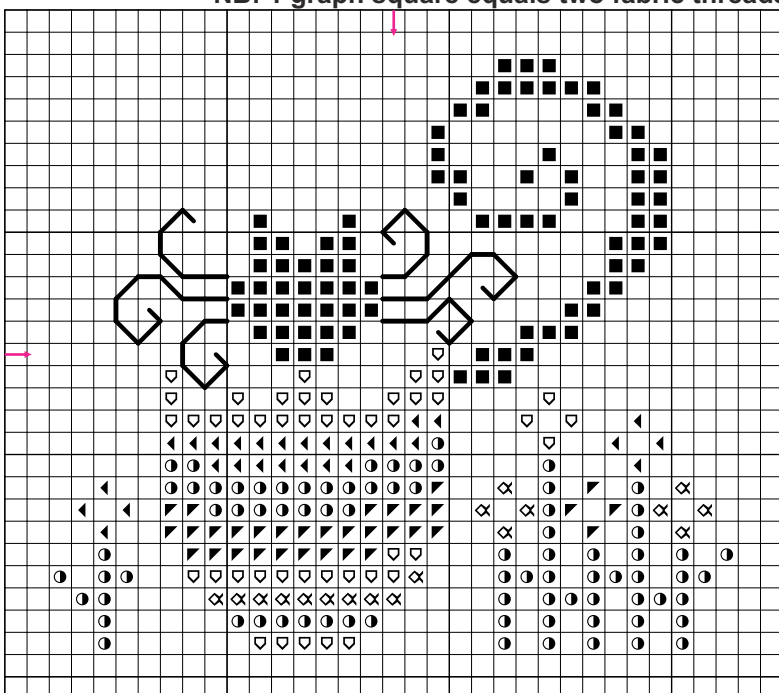

The design lends itself to a quick little personalised card for someone special at Easter time, or perhaps as a decoration on a small drawstring bag full of little chocolate eggs.

There are details on how to make the little bag on my website on the How To page.
